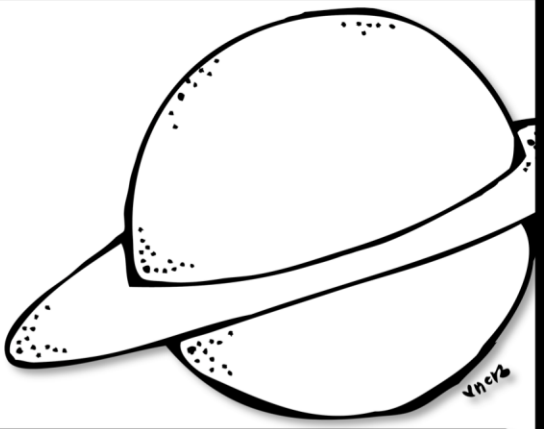
Science Project!!!



What: Your challenge is to design and build a structure that shows how shadows change.

How: Use your creativity to create a structure. It can be any structure that will show shadows (using the sun or another light source).

When: Due on Monday, October 23.

Parent Note: This should be a student-led project. You may assist with a hot glue gun or other tricky things, but we expect your second grader to have made the majority of this project independently.

Rubric: Your second grader will be graded using the below rubric.

Points	Description
___/5	Student presented a neat project on October 23.
___/5	Student presented a structure that shows how shadows change.
___/5	Student explained clearly and at an appropriate volume how the structure works.
___/5	Student showed knowledge of how shadows change.
___/20	TOTAL
